

Global Markets Summer Analyst Programme

Nomura is a leading financial services group and pre-eminent investment bank, backed by a powerful balance sheet. We have unrivalled asset raising abilities and a proven record of delivering value for our clients. Following the acquisition of select Lehman Brothers businesses in Asia, Europe and the Middle East, our combined operation makes us a leader in global investment banking.

Nomura is offering internship positions as the perfect preparation for a subsequent full time role. At the end of the 10 week summer analyst programme we will extend full time offers to strong performers to return to Nomura the following year.

Global Markets summer analysts are provided with the opportunity to rotate on two desks within Fixed Income and Equities. We aim to provide summer analysts with the same level of exposure as a first-year analyst, participating in all situations as full members of the team. They are expected to form effective working relationships and to demonstrate a commitment to the firm's goals and values. During the course of the internship, summer analysts benefit from working closely with a buddy and interacting regularly with a senior mentor. We also ensure extensive contact with Nomura professionals at all levels through training, seminars and informal social functions.

Please refer to our website for further details and to submit your on-line application at: www.nomura.com/europe/careers before the deadline of January 18th 2009.

Additional Information on Nomura's Global Markets Division:

Fixed Income – this combines the experience and expertise of Nomura's syndicate, trading, sales and research capabilities in all the markets we operate in. Our London office works seamlessly with Hong Kong, Tokyo and New York to provide our clients with 24-hour access to global markets. Nomura's franchise combines superior trading and execution capabilities with high quality research, and our global distribution network is well suited to meet the complex financing and investment needs of clients.

Equities - we provide a range of equity products, covering both mature and emerging markets, for corporate and institutional clients globally. Our expert team of traders, salespeople and origination specialists has built success by forming strong client partnerships based on our ability to provide the highest quality execution and distribution. Our traditional strengths in fundamental, quantitative and strategic research continue to provide the competitive advantage our clients seek.
