- Strategy & Change Management
- Sustainable Development
- Technology & Operations

Structure

6 online modules

Credits*

12

What to expect

Cyber criminality is a global phenomenon. The high profitability ensures rapid growth in criminal acts, even though many companies are increasingly investing in security technologies. The capacity of the perpetrators to adopt very fast to new circumstances, technologies that are developing all the time, attacks within the own company and psychological tactics, such as social engineering, make it difficult for companies to protect effectively against cyber criminality.

The certified cybercrime investigator prepares to identify, detect, investigate and prevent cyber criminality. The online course conveys the content via webinars, web tutorials and study materials. The thorough handling of case studies ensures high practical relevance and prepares the participant for their work as effectively as possible.

Ideal for

The course is ideal for professionals in the field of:

- cyber defence
- IT/cyber security
- corporate security
- fraud management
- internal investigators
- For internal auditors who want to improve their knowledge of detecting and preventing cyber crime.

In-house programmes

All our specialist courses are also available as customised programmes. Please ask us for a quotation.

ONLINE COURSE

Venue

11 MONTHS

Duration (online modules, webinars, case studies)

6,800 €

Price (all amounts are exempt from VAT)

*Credits are given according to the European Credit Transfer System (ECTS) for academic and continuing education qualifications. Credits are determined by the amount of time needed to complete the certification course. This includes presence days as well as the individual study time before and after needed to earn the certificate. Credits are not at all based on the level of learning (1 credit = 25 – 30 Study Hours).
