**About:** The TRR 266 *Accounting for Transparency* is a trans-regional Collaborative Research Center funded by the German Research Foundation (*Deutsche Forschungsgemeinschaft – DFG*). As a team of more than 80 senior and junior researchers we examine how accounting and taxation affect firm and regulatory transparency and how regulation and transparency impact our economy and society. We intend to help develop effective regulation for firm transparency and a transparent tax system. Simultaneously, we ensure transparency of our own research. For more information, visit:
