SUSTAINABLE FINANCE
Planning the future with sustainable finance

Sustainability criteria, especially environmental and social aspects, are increasingly gaining importance in the international financial markets. The growing variety of new sustainability products underpins this trend. This creates new opportunities as well as risks, which can challenge the existing business practices of financial institutions and companies.

Course Objective
This certificate program offers a well-founded introduction as well as a practice-oriented consolidation of the topic of sustainable finance. It highlights the most important political developments at the national and European level (keyword Green Deal) and their impact on the financial sector. It shows the business advantages and disadvantages of sustainable finance - in order to make them usable. Most important, however, is the practical implementation and integration into the daily work routine. Accordingly, the most important sustainable financial products are explained, sustainable investment strategies and methods are demonstrated, the significance and use of ESG data, ratings & labels are clarified and climate scenario analyses are discussed. In this way, you will acquire new practical tools that you can implement in your advisory work. Active discussions and practical examples round off the course.

Target Group
This certified course is designed for financial experts and professionals. By this, we mean retail bankers, financial advisors, asset managers, risk managers, etc., and all other professionals in the financial industry, science or civil society who are interested in the topic of sustainable financing. Please feel free to contact us.

All Info on the topic www.fs.de/cesfi

Prof. Dr. Ulf Moslener
• Professor of Environmental Economics & Sustainable Energy Finance
• Research Director of the FS-UNEP Collaborating Centre for Climate & Sustainable Energy Finance

Jonas Hernán Fleer
Senior Programme Manager Sustainable World Academy

STUDY CONTENT

Unit 1
- The World of Sustainability
  - Key factors of climate change and global warming
  - Importance of integration of sustainable considerations into financial markets

Unit 2
- Towards a Sustainable Financial System
  - The role of financial system, stakeholders and financial actors
  - Practical exercises in interactive learning environment

Unit 3
- The role of Regulation and Policy
  - Thorough indication of the role and rationale of regulation in sustainable finance
  - Deep-dive at the EU sustainable finance regulatory and policy landscape

Unit 4
- Sustainability Risks
  - Introduction to the strategic implication of sustainable finance within institutions
  - Exploration of risk and management as well as the opportunities from a strategic point of view

Unit 5
- Impact through finance
  - Overview of sustainable finance risks, and steps taken to identify, measure and mitigate them
  - Introduction to impact measurement and its methodological concepts

Unit 6
- Sustainable finance opportunities
  - Explanation of debt and equity-related sustainable products e.g., Green Bonds

Unit 7
- Banking
  - The market environment, potential, development, and criticism for wholesale and investment, retail, and corporate banking products and services

Unit 8
- Institutional investors
  - Overview of the institutional investors, their mandates and implementation methods

Unit 9
- Insurance
  - The role of insurance in the wider financial system and the impact of climate-related risks on finance sector

Unit 10
- Recap & Outlook
  - Summary and re-cap of the learning materials from Unit 1 to Unit 9

STUDY CONCEPT

Our certificate programs help you to systematically develop your qualifications and knowledge, to shape them successfully and to advance your career.

Our online certificate courses are offered on a part-time basis and take 6 months to complete. The flexible approach of our courses allows you to follow your own and individual curriculum, taking into account a few deadlines. This makes it possible to complete the course in parallel with demanding jobs and private commitments.

The Certified Expert in Sustainable Finance (CESFi) is designed as an online course, but can be complemented by an optional two-day face-to-face training course at the Frankfurt School of Finance & Management (Frankfurt am Main). Methodologically, this course is based on video lectures, PDF scripts, interactive forums, exercises, and case studies. The topics and international discussions, best practices and lessons learned are deepened by means of practical examples from the field. Short online quizzes check your learning progress.

At the end of the course, the participants work on practical assignments and put their newly acquired knowledge into practice - supported by our experienced team of trainers. They are given the opportunity to take part in a discussion forum. Here, all course-specific topics and contents are discussed and a lively exchange of experiences and ideas takes place. Furthermore, the multilingual e-Campus team is always available to answer questions of any kind.

After successfully completing the e-learning course, graduates receive a Frankfurt School certificate, which will entitle them to identify themselves as Certified Experts in Sustainable Finance.
The voluntary classroom training is a practical complement to the e-learning course. It can be booked independently of the course or in combination with it. The 2-day classroom training takes place on the new campus of the Frankfurt School of Finance & Management. Although it does not affect the certificate issue, it provides excellent support for the practical application of the acquired knowledge. You will get to know your fellow students and trainers personally, and have the chance to discuss and network with them about relevant topics.

An agenda for the training could look like the following:

<table>
<thead>
<tr>
<th>Time / Day</th>
<th>Day 1</th>
<th>Day 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>09:00 - 12:30</td>

Menglu Neupert-Zhuang, Sustainable Finance Expert & Project Manager
Youni Mathies, FS-UNEP Centre
Dr. Anne Michaels, Luiza Linton and Urata Biqkaj-Müller, Magnolia Consulting GmbH

The FS-UNEP Centre
The content of this course was developed by the Frankfurt School - UNEP Collaborating Centre for Climate & Sustainable Energy Finance. The Centre has been a strategic cooperation between Frankfurt School and the United Nations Environment Programme (UN Environment) since 2009. The aim of the Centre is to promote public and private sector investment in the reduction of greenhouse gas emissions, but also in the field of climate adaptation measures in developing and emerging countries, as well as in industrialized nations. As a “Think and Do-Tank” the Centre combines research, teaching, training and consulting services.

Sustainable World Academy
The Sustainable World Academy develops technical, educational and professional training courses to promote the UN goals for sustainable development (UN-SDGs). The courses are offered online through our e-campus platform and in classroom, e.g., our Inclusive Finance Summer Academy.

Sustainable World Academy 2023
WE SHAPE THE ECONOMY AND FUTURE

Our graduates are the authors of the Frankfurt School success story. For more than 60 years we have been training young talents and experienced professionals.

The Frankfurt School of Finance & Management is a leading private business school with its headquarters on the new campus in Frankfurt am Main. It is represented by numerous regional educational centers throughout Germany and many affiliates and programs abroad.

It offers challenging study and executive education opportunities in various program areas. These include scientific research centers and numerous national and international consulting projects. All teaching, research and consulting activities take place in the field of conflict between business, finance and management.

We see finance as a cross-divisional function in all companies, who deal with the management of funds. In management, we support managers in their efforts to manage staff and material resources to achieve the goals of the company as economically as possible.

With its educational programs, courses of study, research and consultancy projects, the Frankfurt School is a valued source of advice and inspiration, as well as an educational partner for companies and organizations, for young professionals and experienced specialists and managers.

Reasons for the Frankfurt School

- Quality of students and lecturers
- Personalized support
- Learning in small study groups
- High practical relevance
- Connection to the financial sector, economy and alumni
- Training/vocational integration of the studies
- Professional Career Services
- Excellent future prospects for graduates
- International orientation
