Degree: Master of Science (MSc)

Target audience

We welcome graduates or young professionals who aspire to develop cross-functional business problem solving skills by applying machine learning technology and data science to navigate the modern data ecosystem. Many of our students hold degrees with a focus on computer science, statistics, mathematics or logic. Candidates with degrees in unrelated fields should show strong quantitative skills.

Highlights

- A combination of applied Machine Learning, Data Science and Business Problem Solving
- Extended company projects on real-life cases in cooperation with leading companies throughout 3rd semester
- Ethical ramifications of the fourth wave of industrialisation
- A unique time model that permits you to work three days a week while pursuing a full-time master's degree (3-day model)
